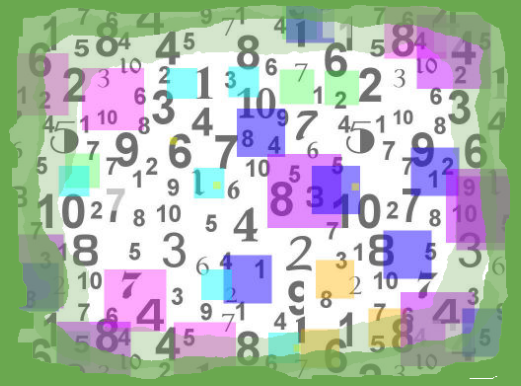
Learn Users Preferences

Article Ranking



Aim: Get the most relevant and interesting Articles to the User

Scoring

Image +10

New +10

Length +20

User Topic +20

12 Hours Old -10

24 Hours Old -20

36 Hours Old -30

User Reads -20

Learning Preferences

The problem: User is reading Articles, we want to recommend like Articles

The solution: Create training set based on what Articles the User reads

New Articles are checked for similarity to training set and assigned a rank

Value Proposition

Profit Model

Processes

Resources

The Newsfast Value Proposition

Advertisers are our sole customers

User will never be charged for service

Customers want to promote their product

Creating a hub for users

Revenue Model

The types of advertising we will cater for initially will be

- Cost per Click (CPC)
- Cost per Impression (CPM)
- Later on we will explore options in Private Advertising and Affiliates

Cost Model

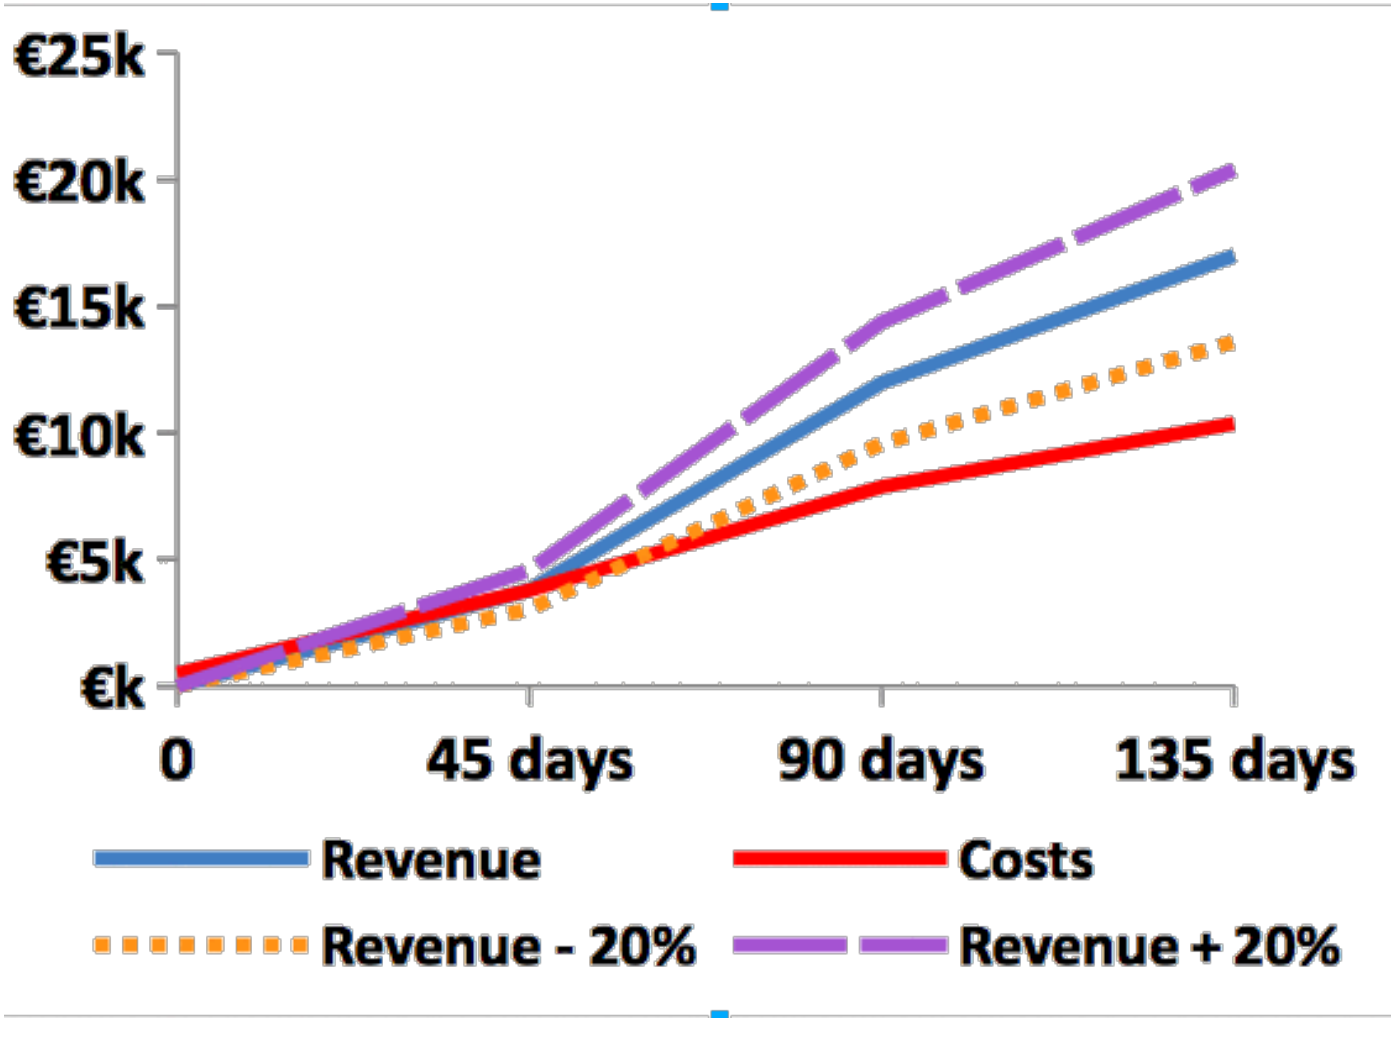
Staff

Server Cost

Promotions

Marketing

Revenue Vs Cost



Critical Processes

Build User Base

Relationship with key partners

Be revenue focused

Critical Resources

Content Feeds

Marketing Partner

Finance Resource

Business and Technical Skills
